March held to mark Gaucher Disease month

NEW DELHI: A silent march was held in the Capital on Saturday to mark the Gaucher Disease Awareness Month.

The walk was organised by Lysosomal Storage Disorder Support Society (LSDSS) with an aim to sensitise people and seek financial support from the government for the treatment of the rare, debilitating genetic disorder. About 50 children, some even having difficulty in walking, and their parents holding placards and banners participated in the walk from Tolstoy Marg to Jantar Mantar. —PTI
